

# Reclosable Fasteners for Electronics and Electrical

*Hidden strength for multiple openings and closings*

To store a hand-held control panel when not in use, 3M™ Scotchmate™ Reclosable Fasteners attach the panel to the side of the manufacturing equipment. High performance acrylic adhesive backing resists in-factory heat up to 200°F (93°C).

Pre-cut 3M™ Dual Lock™ Reclosable Fasteners hold access panels in electronic equipment. Pre-cut shapes are available with pressure sensitive adhesive or plain backing. Pop-in stems, slide-in pieces or mechanical attachments provide alternative options.

To attach decorative and acoustic control panels to sound system speakers, a die-cut circle of 3M™ Dual Lock™ Reclosable Fastener is inset into the speaker cabinet. The mating half is on the panel and fits into the inset to keep the panel secure and flush with the housing.

3M™ Dual Lock™ Reclosable Fastener holds the plastic bracket of a document holder to the side of a CRT screen. The strength of the fastener holds even as the holder is swung back and forth to position the document. When not in use, the bracket readily snaps free for storing the holder.

3M Reclosable Fasteners hide beneath the surface. You can eliminate the installation work and weight of screws, bolts and metal closures while keeping surfaces smooth and free of holes and protrusions. Select closure strengths, shapes, thicknesses, opaque or transparent and plain or pressure sensitive adhesive backings to meet varying requirements. Adhesive-backings are available with a selection of characteristics such as bonding to low surface energy plastics, flame and high temperature resistance, plasticizer resistance and more.

Select 3M™ Scotchmate™ Reclosable Fasteners for thousands of easy openings and closings or 3M™ Dual Lock™ Reclosable Fasteners for hundreds of closures with greater holding power.

## 3M™ Reclosable Fasteners for Electronics and Electrical

6

Removable plastic storage box for computer media attaches to the side of the CRT screen with strips of 3M™ Dual Lock™ Reclosable Fastener. 3M pressure sensitive adhesive backing bonds to most plastics on contact.

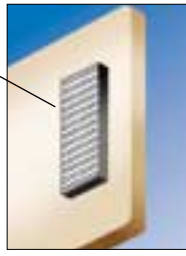

7

Die-cut 3M™ Scotchmate™ Flame Resistant Reclosable Hook and Loop Fastener on the back of a swing-out video screen stabilizes the unit against the wall when not in use. The mating half of the fastener is bonded to the wall.

8

9

For holding an automatic toll transponder, one strip of 3M™ Dual Lock™ Reclosable Fastener is bonded to the windshield; the other to the back of the unit. High strength closure resists road bumps and vibration.

10

3M™ Dual Lock Reclosable Fasteners hold the keyboard in place for the 3M™ Adjustable Keyboard Tray Oversized Mouse Platform with Wrist Rest.
